Supercommittee

Semester 1 Committee

Of the 10 committee members elected at the 2025 Annual General Meeting, 4 committee members had been in previous committees and 6 came from subcommittees.

President	Nhan Nguyen	
Vice President	Timmy Hess	
Treasurer	Amiru Peeli Kumburage	
Secretary	Sophie Li	
Industry Director	Steph Koutsimpiris	
Events Director	Hugo Knights-Burke	retiring
Marketing Director	Satria Hadiwijaya	retiring
Fourth Year Representative	Leonie Chim	
Third Year Representative	Erin Holland	retiring
Second Year Representative	Om Patel	
First Year Representative	Sayuni Perera	
Post-Graduate Representative	Arthur Nguyen	March - May
Post-Graduate Representative	Oliver Hoy	October - January

Semester 2 Committee

President	Nhan Nguyen	
Vice President	Timmy Hess	
Treasurer	Amiru Peeli Kumburage	
Secretary	Sophie Li	
Industry Director	Steph Koutsimpiris	
Events Director	Sophie Windust	incoming
Marketing Director	Arthur Nguyen	incoming
Fourth Year Representative	Leonie Chim	
Third Year Representative	Christopher Burton	incoming
Second Year Representative	Om Patel	
First Year Representative	Sayuni Perera	
Post-Graduate Representative	Trajco Nikolov	incoming

Executive

President	Nhan Nguyen
Vice President	Timmy Hess
Treasurer	Amiru Peeli Kumburage
Secretary	Sophie Li

Academic Subcommittee

President	Nhan Nguyen
Fourth Year Representative	Leonie Chim
Third Year Representative	Erin Holland
Second Year Representative	Om Patel
First Year Representative	Sayuni Perera
Post-Graduate Representative	Arthur Nguyen
Post-Graduate Representative	Oliver Hoy

Technical Subcommittee

Vice President	Timmy Hess
Technical Officer	Cameron Massie
Technical Officer	Chhay Irseng
Technical Officer	Alan Nie
Technical Officer	Tim Siderellis
Technical Officer	Lewis Cavolo
Technical Officer	Roy Meng
Technical Officer	Infrayogo Rusmi
Technical Officer	Kevin Nanayakkara
Technical Officer	Elliott Varasdi

Industry Subcommittee

Industry Director	Steph Koutsimpiris

Marketing Officer	Tharinsa Rathnayake
Marketing Officer	Sehaj Attly
Marketing Officer	Tadiwa Hofisi
Marketing Officer	Kevin Healy
Marketing Officer	Ozden Huseyin
Marketing Officer	Muhtasim Azad

Overview

SMEE has organised over 30 events in total during semester 1, including 20 distinct events, alongside ongoing advocacy, support and the daily SMEE Shop. Events have attracted combined attendance of 1000.

Over the year to date we have had \$8194.42 income, \$5478.01 expenditure from the bank account and approximately \$750 expenditure from the cost centre.

There are roughly 322 SMEE members, 800 Instagram followers, and 1000 members in the SMEE Discord server.

Our academic advisor is Aaron Choong, who we have met with regularly and has assisted us with venue bookings, the cost centre and department relations.

Events calendar

A calendar detailing all events run by, or in collaboration, with SMEE can be accessed [here](#).

Summer break	MESS First Year Information Expo			
Week 0	MSA Orientation Festival			
Week 1				Lab Skills Workshop
Week 2			FPGAs in Quart w/ MESS	Representative Elections
Week 3		ECSE Welcome Event SMEE Study	LTSpice Workshop	Design Project Theory
Week 4		SMEE Study ECSE Department Student Staff Consultative Committee		Design Project PCB Design Movie Night w/ MUES x BESS x MECC x MAMEC
	MESS Student Experience Feedback Survey			
Week 5	Railway Signaling Panel w/ TEM x MREx	SMEE Study	Design Project PCB Design	
	SMEE Shop			
Mid-semester break			Meeting MUEEC at UniMelb	
Week 6	Tech Industry Night w/ MECC x WEM	SMEE Study	SMEE Shop	
Week 7		SMEE Study	SMEE Shop	
Week 8		C Revision Workshop SMEE Study		Design Project PCB Soldering
	SMEE Shop			
Week 9		Mario Kart Tournament SMEE Study	Design Project PCB Soldering	Ordinary General Meeting and Project Showcase
	SMEE Shop			
Week 10		ECSE Department Student Staff Consultative Committee SMEE Study	Introduction to Soldering	
	SMEE Shop			
Week 11	Tollara Mobile Networks 101 ECE3141 guest lecture	SMEE Study		
	SMEE Shop			
Week 12		BBQ SMEE Study	Women in Electrical Engineering Panel w/ WEM	
Seotvac			Meeting Over w/ Engineering w/ MSA x MESS	Inter-Unit Study Session w/ MUEEC x RMIT MSA
Exams	Bowling and Laser Tag			

Academic

The Academic Subcommittee was newly introduced this semester, comprising the elected year level representatives on the Committee. Our priority has been to support the transition into the ECSE specialisation for second years, and to link students with wellbeing and academic support resources. An early effort to introduce a peer mentoring program did not proceed due to lack of mentor interest. Instead, our team has led initiatives such as the ECSE Survival Guide and contributed to the organisation of several social events aimed at connecting first and second years with senior students. I thank the Academic representatives, particularly the retiring members and those new to SMEE and university, for their dedication to making SMEE an accessible and integral support for the entire cohort.

Moving forward, the Academic Subcommittee will refocus on our ongoing academic advocacy initiatives, including the ECSE Student-Staff Consultative Committee, MESS Student Experience Feedback Survey and ad-hoc advocacy. Alongside Academic-led activities, the Academic representatives will be supporting other subcommittees across the society with their semester 2 events.

Nhan, President and Academic Director

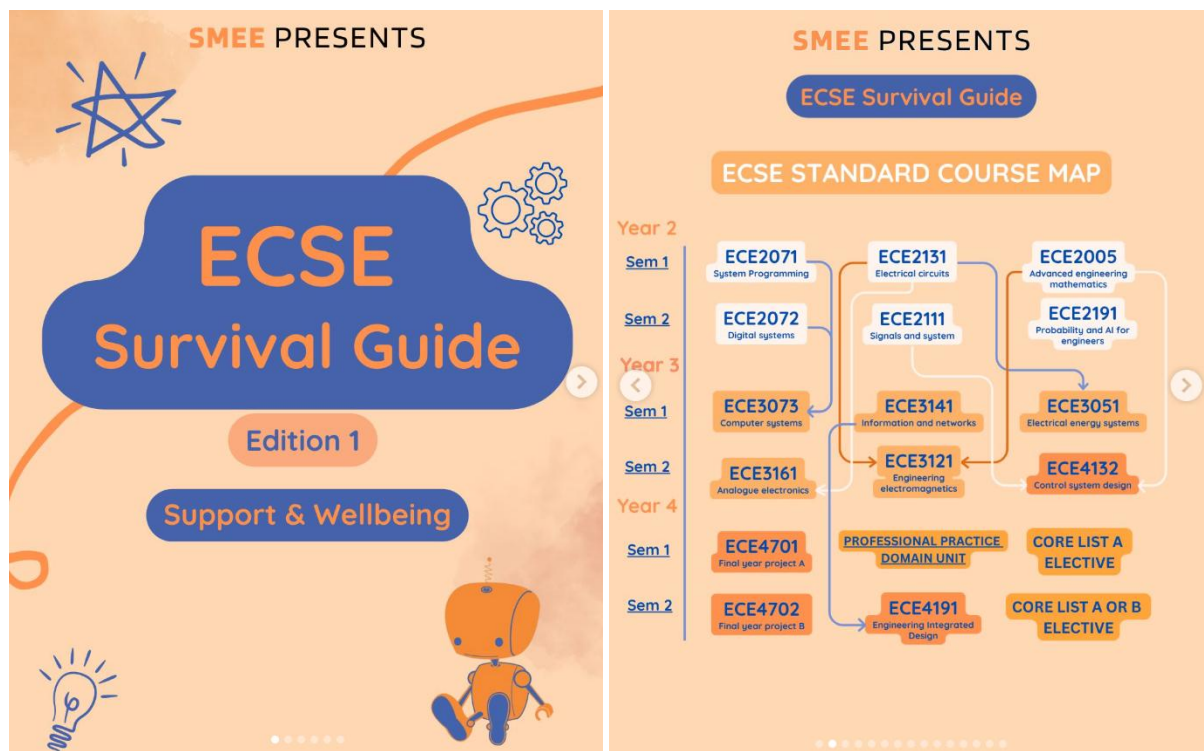

ECSE Survival Guide

Organisers: Nhan Nguyen, Oliver Hoy

Contributors: Cameron Massie, Steph Koutsimpiris, Aiden Doak, Jack Meehan, Leonie Chim, Erin Holland, Riley Cheung, Lacie Nguyen

Designers: Tharinsa Rathnayake, Sayuni Perera, Arthur Nguyen

Second year engineering can present a daunting challenge as students adjust to new expectations while entering a stressful and difficult specialisation in electrical and computer systems engineering. The ECSE Survival Guide's principal objective was to ease the transition by helping incoming ECSE students to navigate and succeed in their new specialisation. Through a series of digestible Instagram posts, it helped students become aware of the resources and support available to them and passed on tips from senior students. The ECSE Survival Guide can be accessed on Instagram or [here](#).

SMEE Study

Organisers: Erin Holland

Volunteers: Sayuni Perera, Nhan Nguyen

Marketing: Leonie Chim, Muhtasim Azad

Weekly attendance: ~5

Weekly study sessions were hosted in the ECSE Common Room with study music and snacks provided, the ideal setting to lock in on studying and preparing for upcoming classes.

University Calendar

Organisers: Sophie Li

The subscribable university calendar can be integrated into students' regular calendars with notifications enabled, ensuring that they never miss an important date. The calendar can be accessed [here](#).

Student Experience Feedback Survey

Organised by the Monash Engineering Students Society

Volunteers: Arthur Nguyen, Nhan Nguyen

SMEE supports MESS with the Student Experience Feedback Survey in ECSE units each semester. Volunteers from SMEE help with lecture bashing to promote SEFS responses, and with preparing and filtering reports before sending them to unit staff. SEFS results provide unit staff with valuable feedback that can be implemented immediately within the semester, helping staff understand student needs and concerns while improving the quality of unit delivery and experience for students.

ECSE Student-Staff Consultative Committee

Hosted by the Department of Electrical and Computer Systems Engineering

Volunteers: Nhan Nguyen, Leonie Chim, Erin Holland, Om Patel, Oliver Hoy, Sophie Windust

Marketing: Tharinsa Rathnayake, Muhtasim Azad

SMEE helped advertise for nominations to the SSCC, ensuring that a wide representative audience of interested and qualified students would have the opportunity to volunteer. SMEE academic representatives and other committee members also sit on the SSCC, contributing to feedback and discussions while ensuring that the SMEE committee understands views across the cohort to help us in designing initiatives to support students.

Technical

SMEE ran a lot of technical events! Over the course of the weeks leading up to and the subsequent semester, the Technical Subcommittee was busy active in designing and delivering a wide array of technical workshops. Many hours were spent developing them and this was reflected in the high quality of the workshops and high participant satisfaction. Overall we had over 150 attendees with about 100 of them being unique, highlighting both the reach of the workshops as well as the quality as many students would continue coming back. The workshops covered a variety of topics and were designed to both supplement and extend content taught within the course.

Timmy, Vice President and Technical Director

Moisture Sensor PCB Design Project

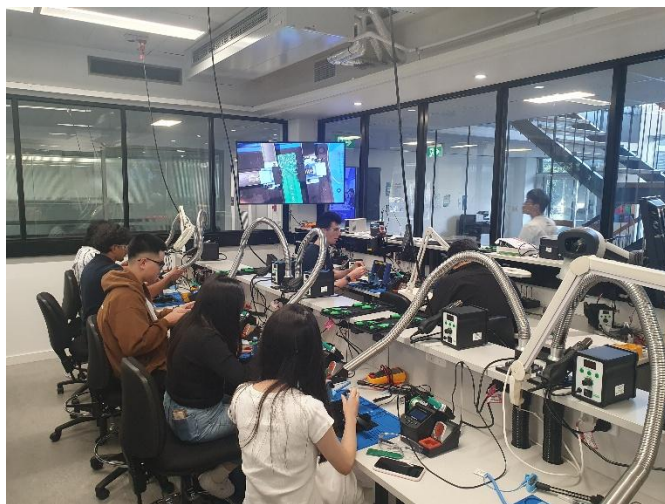

Organisers: Chhay Irseng, Alan Nie, Timmy Hess

Volunteers: Cameron Massie, Amiru Peeli Kumburage, Elliott Varasdi

Marketing: Ozden Huseyin

Attendance: ~30

The Moisture Sensor PCB Design Project involved the organisation of three distinct components of the total workshop series. Across weeks 3-9, the organisers created lesson plans, guided instructions, and live demonstrations on how to complete the project. The beginning of the series involved teaching students how to use KiCad to model a PCB of their own. After the development of their PCBs, students were able to get their designs printed to be used for a final product. For those who were unsuccessful in completing the PCB to full functionality, a premade PCB awaited them for soldering. In their final workshop, a live soldering demonstration and the opportunity to solder their designs with the assistance of the ECSE Electrical Makerspace was possible. A recording of the event can be found [here](#).

Introduction to Soldering

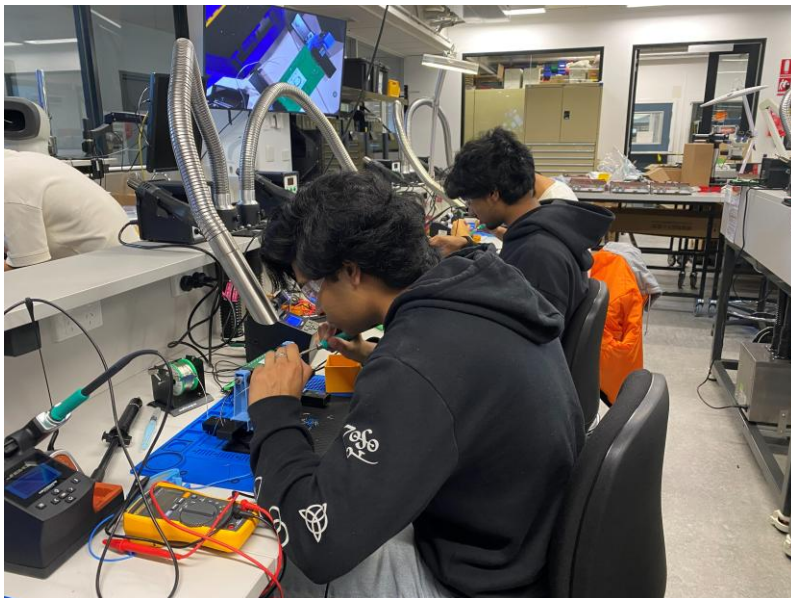

Organisers: Roy Meng, Infrayogo Rusmi, Alan Nie, Timmy Hess

Volunteers: Chhay Irseng

Marketing: Muhtasim Azad

Attendance: ~10

The Introduction to Soldering workshop ran for two hours in the ECSE Electrical Makerspace. This space allowed students to gain hands-on experience with soldering, valuable for personal development with prototyping. The organising team had created a PCB that utilised a binary counter to display a chasing LED pattern for the participating students to take home after the workshop. A live soldering demonstration to assist those who had not soldered previously allowed for students to model their soldering similarly. The PCB GitHub can be accessed [here](#).

C Revision Workshop

Organisers: Roy Meng, Cameron Massie, Tim Siderellis

Volunteers: Timmy Hess, Elliott Varasdi

Attendance: ~40

The C Revision Workshop was targeted towards students undertaking ECE2071. Aimed at strengthening knowledge for students before their mid-semester exam, this workshop was led with

content overview as well as sample questions developed by the organisers. In conjunction, the two-hour workshop allowed students to gain valuable directed revision time alongside their peers. This event had such an impact on students that several in the ECE2071 cohort enquired about the potential of holding an end of semester exam revision workshop.

Lab Skills Workshop

Organisers: Cameron Massie, Lewis Cavolo, Tim Siderellis

Volunteers: Timmy Hess, Alan Nie, Infrayogo Rusmi

Marketing: Tharinsa Rathnayake, Ozden Huseyin

Attendance: ~25

Lab Skills are a fundamental component of all engineering studies. For students undertaking ECSE, these skills are foundational and required across the board for all stages of their university life and careers. Targeted towards students beginning ECSE specialisation and any keen first years, this workshop aimed at reinforcing the important skills using laboratory equipment such as Oscilloscopes and Function Generators. Occurring in week 1, this allowed students to approach their classes in a comfortable and confident manner from the beginning.

LTSpice Workshop

Organisers: Infrayogo Rusmi, Kevin Nanayakkara

Volunteers: Timmy Hess, Alan Nie

Attendance: ~10

Simulation is a fundamental tool used in any circuitry development, like lab equipment, so a confident and comfortable mindset in using it is integral. Ran in week 2, this event targeted ECE2131 students who dive right into circuit design and testing from the beginning, as well as any other students who were wanting to learn or brush up their knowledge. Through a series of exercises, students were able to model circuits and conduct meaningful analysis, as well as understand the general layout of the software and any tips or tricks that senior students could provide them with.

Orientation Festival Flappy Bird

Developers: Chhay Irseng, Roy Meng

Designers: Satria Hadiwijaya

Orientation week has students flooding in, eager to learn about what university life holds for them. As an MSA C&S club, SMEE's stall every year aims to be engaging and enticing for students to approach. To make a lasting impression, the developers and designers of SMEE Flappy Bird showcased the projects which SMEE undertakes. Aside from running workshops, the development of resources is all reliant on the technical team, which was demonstrated through game design and functionality. Over the course of O-Week, there were 72 players that engaged in the game, further enquiring about how SMEE creates projects and the portfolio created.

The GitHub for this project can be accessed [here](#).

Industry

Over this past semester I have been privileged with being able to share the events I have co-organised. I am very grateful to have an engaged team of Officers, as well as committee members willing to help. Having run five events, including two panel nights, two guest lectures, and a networking event, this has been a very busy semester. I have thoroughly enjoyed working with other clubs and teams to help organise these events as I believe the collaborative aspect is one of the most enjoyable components of everything I have done.

After a very busy semester one, it is exciting to jump back into planning and organising events for students to attend. I am looking forward to continuing the panel series, as well as thinking of anything new and enticing that could attract students to engage in industry. Engaging in industry is such an important part of the engineering sector and I hope for the remainder of my term I can continue to facilitate meaningful connections.

Steph, Industry Director

Tech Industry Night

With the Mechatronics Engineering Clayton Club and Women in Engineering at Monash

Companies attending: AECOM, ADF Careers, Telstra, Institution of Engineering and Technology, Commonwealth Bank, Aurecon, Engineers Australia, Major Tech, Citipower/Powercor, Teach for Australia, FDM, Lendlease, Acciona, Extel, Invetech

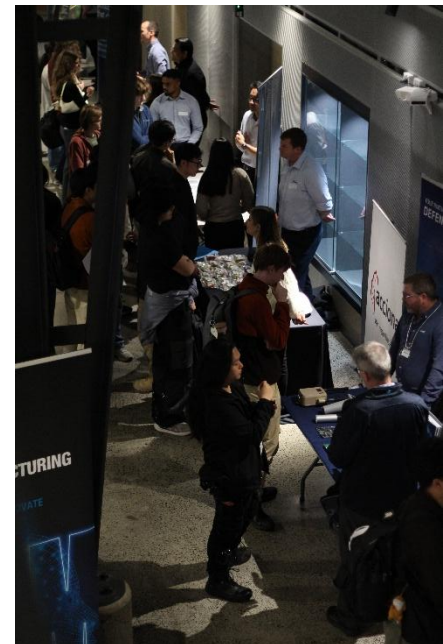

Organisers: Steph Koutsimpiris, Xavier Marie, Jeanne Eusebe

Volunteers: Christopher Burton, Sophie Windust, Ruchir Bhatt, Kenuli Wijegunaratne, Wilbert Manyika, Sarvesh Sridhar, Sophie Li, Hugo Knights-Burke, Leonie Chim, Sayuni Perera, Arthur Nguyen, Nhan Nguyen

Marketing: Sehaj Attly

Attendance: ~150

Tech Industry Night (TIN) is the keystone Industry event in the calendar. With the goal of allowing students to explore their future pathways, this event is centred around bringing together curious students and keen industry members. As a large-scale networking event with over 200 attendees in 2026, TIN was a collaborative effort with MECC and WEM, allowing for a very large organisational team to drive up a very successful evening. With fifteen companies in

attendance, hosted at Monash Innovation Labs, TIN allowed students to learn about attending companies' internship and graduate opportunities, as well as providing students in first year with an idea what a career in ECSE or Mechatronics would look like.

Railway Signalling Panel

With the Transport Engineers at Monash and Monash Railway Express

Moderator: Steph Koutsimpiris

Panelists:

- Neil Shingleton, Principal Design Engineer at Egis
- Jennifer Nguyen, Signalling Design Engineer at Egis
- Culum Bennington, Signalling Project Manager at Metro Trains Melbourne / Southern Program Alliance

Organisers: Steph Koutsimpiris, James Wylie, Nikhita Rajaram

Volunteers: Hugo Knights-Burke, Julia Lao, Jue Lyas Law, Nhan Nguyen

Marketing: Tadiwa Hofisi

Attendance: ~50

The Railway Signalling Panel was the first of the Industry Pathways Panel Nights series being run through 2026. In collaboration with Transport Engineers at Monash and Monash Railway Express, the event was organised to inform students about a very interesting but less well-known sector in Railway Signalling. Joined by three experienced engineers in the field working on current projects, students were able to learn about the breadth of such a niche career path. Structured questions led by the moderator allowed for a brief overview for the audience and panelists to warm up to each other, which was followed by a constant stream of questions from the eager audience. A recording of the event can be found [here](#).

Women in Electrical Engineering Panel

With the Women in Engineering at Monash

Moderator: Steph Koutsimpiris

Panelists:

- Gretel Gibson-Bourke, Graduate Electrical Engineer at AECOM
- Mackenzie Quirk, Captain at ADF
- Maria Jose, Network Planning Engineer at Citipower/Powercor
- Uthpala Ekanayake, Research Fellow at Monash University
- Sayoni Sanyal, Power Engineer at BECA

Organisers: Steph Koutsimpiris,
Honey Mutuel, Kenuli
Wijegunaratne

Volunteers: Hugo Knights-Burke,
Lee Nolan, Sayuni Perera, Cameron
Massie, Amiru Peeli Kumburage,
Nhan Nguyen, Linh Trinh, Om Patel

Marketing: Tadiwa Hofisi

Attendees: ~50

The Women in Electrical Engineering Panel night was co-hosted with Women in Engineering at Monash. This collaboration with WEM brought together not just students from ECSE but also other faculties in the broader engineering space. As a specialisation with historically low engagement from women, this was an important topic to explore.

The structure of the evening was the same as the Railway Signalling Panel. The evening included a very inclusive discussion of how the workforce and university life have been for the panelists and any advice they had for students. The emphasis on a strong support network was key throughout the discussion, which is partly why this event was run, to bring people together to create this network.

Mobile Networks 101

Speakers:

- Adam Perara, Portfolio Lead - Network Leadership at Telstra
- Yoong Lim, Portfolio Lead - Performance & Optimisation at Telstra

Organisers: Steph Koutsimpiris

Attendees: ~200

Telstra is one of Australia's largest Telecommunications companies. Through ECE3141, students learn about the telecommunications pathway in ECSE, a very important and rapidly progressing field. Having two speakers working on the front lines of improving Australia's networks, students were able to hear about topics that were linked to content that had been explored throughout the ECE3141 course. By providing a connection in what students are learning and how it applies, the gap between learning and understanding forms with the key part of "why?" explained. With over 200 students listening in in-person or online, this was a valuable link from learning to future paths, inspiring students to enquire about further studies down the telecommunications pathway. A recording of the event can be found [here](#).

FPGAs in Quant

With the Monash Engineering Students Society and speakers from QRT

Organisers: Steph Koutsimpiris, Timmy Hess, Frederick Hughes

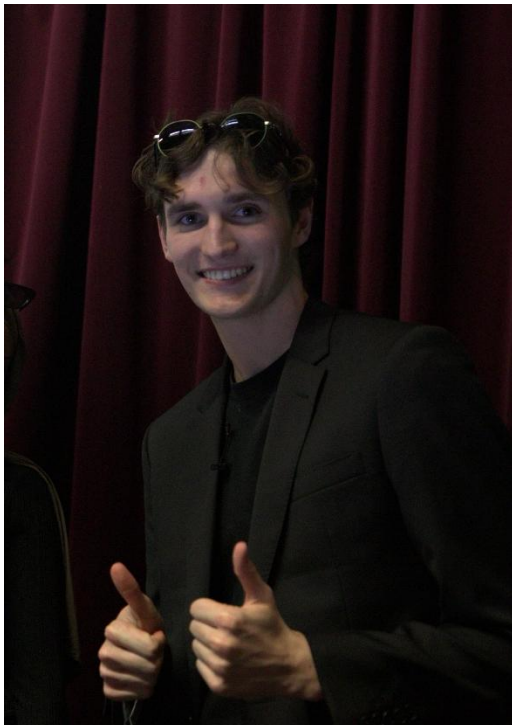

Attendance: ~25

FPGA Technology is very prevalent in the engineering embedded systems design world, but also in the finance world with trading. Used in ECE2072 and ECE3073, students develop a lot of hands-on experience with the true capabilities of FPGAs. Like the Mobile Networks 101 guest lecture, a large volume of ECSE students came to listen to two representatives from QRT, an international firm that have their Australian HQ in Sydney. Through this lecture, the speakers explained what their day-to-day life looked like and how it all links to university learning, emphasising the importance for electrical engineers to move into Quantitative Trading, as well as how FPGAs are so powerful.

Social Events

Throughout the past semester, our Events Team held numerous social events aimed at connecting our student cohort and improving social wellbeing in Electrical Engineering. This semester, we focused on providing a wide range of activities to cater for as much of the cohort as possible, from a relaxed movie screening to an active bowling and laser tag event. Our team also worked on improving attendance at events across the board through something no uni student can resist, good food! We consistently hit election attendance goals without issue, and the crowds were overwhelmingly positive about our food options at all events.

Some positives included discovering the now staple election food; Banh-SMEE, and students cleaning up Souvlakia, Sushi and more at our Tech Industry Night. I look forward to seeing where Events goes from here and thank my team and the society for an amazing semester 1!

Hugo, Events Director (Semester 1)

Kicking off semester 2, the Events Subcommittee is looking forward to hosting a welcome celebration in the new common space for SMEE and ECSE students. Our upcoming plans include a barbecue, a casual Secret Garden catch-up to destress between classes, and a Mario Kart tournament. Additionally, the Events team will be supporting the Industry and Technical teams with upcoming panels and the Robot Building Competition.

We are also collaborating with other clubs, such as the Monash Biomedical Engineering Student Society for a board games night, and extending our external relationships with the Melbourne University Electrical Engineering Club and RMIT's Mechatronics Student Association for a joint event.

Sophie, Events Director (Semester 2)

Movie Night

With the Monash Biomedical Engineering Student Society, Mechatronics Engineering Clayton Club, Materials Engineering Society and Monash Aerospace & Mechanical Engineering Club

Organisers: Hugo Knights-Burke, Fatima Baghdadi, Paige Mackey, Catherine He, Jeanne Eusebe, Xavier Marie, Aditya Shetty, Alex Jibu

Volunteers: Sarvesh Sridhar

Attendance: ~125

The Movie Night collaboration allowed students of a variety of specialisations to come into the MSA Student Theatre to watch The Matrix. Being very futuristic based, this allowed for some interesting discourse after the

movie about the comparisons of what was expected when filming and what has happened in the last few decades. With free fresh popcorn and soft drinks, the \$2 tickets were difficult to resist. Alongside the movie, attendees were encouraged to dress up in their best Matrix outfit, with prizes handed out to participants, allowing for an extra fun twist to a movie night.

Bowling and Laser Tag

Organisers: Hugo Knights-Burke

Marketing: Sayuni Perera

Attendees: ~10

SMEE Bowling hosted at Timezone Clayton was an event run on the smaller side as a break for students during the exam period. With two rounds of bowling, arcade time, and several games of laser tag, students were able to unwind and relax with some light-hearted competition to take their focus off exams and onto their friends. This much-needed break from the all too familiar exam stress was welcomed by all who attended, as a fun structured break.

ECSE Welcome Event

Organisers: Leonie Chim

Attendance: ~20

Starting university can be extremely daunting. Having to do it twice meeting an entirely new cohort when you choose your specialisation makes it even more difficult. This allowed for the perfect opportunity as the student representatives to provide a warm welcome through the ECSE Welcome Event.

With yummy baked goods and fruits, this casual hangout allowed for a low stress environment for people to meet each other outside the confines of a classroom. As well as an opportunity for students to meet each other, SMEE was able to explore the great depth of resources and opportunities for students in ECSE.

Mario Kart Tournament

Organisers: Sayuni Perera

Volunteers: Arthur Nguyen, Sophie Li

Attendees: ~10

The Mario Kart Tournament took place to bring students together for their shared passion of Mario Kart. As a truly nostalgic game, students welcomed the idea and came to test their luck against their peers. Hosted by the Academic Subcommittee, this event was targeting students in need of a well-deserved break during the difficult period of semester in week 9, as well as allowing students to come together and make new friends. With prizes to win, this was a great way to get students to socialise with some low stress competition.

BBQ

Organisers: Om Patel, Leonie Chim

Volunteers: Sayuni Perera, Travis Wills, Tanmay Katalli, Abhav Chenanda Karumbaiah

Attendees: ~50

SMEE BBQs have not been run in recent years, so as an idea for a week 12 study break, the organisers came together to put on some free food for SMEE members. With a flood of students after a nice hot snag and a soft drink to accompany them in their studying, this made for the perfect end of semester milestone to conclude a very busy semester's worth of events.

Representative Elections Meeting

Organisers: Sophie Li, Nhan Nguyen, Hugo Knights-Burke

Marketing: Tadiwa Hofisi, Muhtasim Azad

Attendance: ~20

Held in the beginning of the semester, elections were run to fill out the vacancies of the valuable first year, second year, and post graduate representative positions. Students were encouraged to give speeches about what they would bring to the ECSE cohort, as well as the opportunity to meet the committee and try to get involved in other events. With the elections people were welcomed with Banh Mis, now colloquially referred to as Banh SMEEs. These elections took place prior to the OGM to have a full committee in the interim.

Ordinary General Meeting and Project Showcase

Organisers: Hugo Knights-Burke, Thomas Ma, Sophie Li, Nhan Nguyen

Volunteers: Amiru Peeli Kumburage, Erin Holland, Timmy Hess

Attendees: ~40

Following positive reception at the Elections, Banh SMEE made a reappearance by popular demand. The OGM had a high attendance, and all vacant committee positions were filled with an enthusiastic pool of applicants. However, this was only half the show, as the Project Showcase was taking

place at the same time with awards given to people for their incredible personal creations. The Project Showcase allowed for students to have a forum to meet others potentially making similar things, for inspiration to come to others, as well as encouragement and feedback for students pursuing projects for their portfolios.

Projects showcased included:

- ICE to Electric Car Motor Conversion by Thomas Ma
- Flight Simulator Throttle by Hugo Knights-Burke
- Club Election Ballot System by Spiridon Sklavenitis
- E-Paper Photo Frame by Timmy Hess

Outreach and Marketing

Marketing at SMEE has been great this semester. From O-Week onwards, we've been steadily pumping out Instagram reels and infographics while collaborating with other subcommittees. The merchandise and the Flappy Bird game during O-Week were real highlights. Overall, it's been a valuable learning experience for everyone at SMEE and hopefully heading into next semester stronger.

Satria, Marketing Director (Semester 1)

After the marketing restructuring by the previous Marketing Director, I wish to put it into practice and advance them even further. In semester 2, I'm keen to expand our marketing frequency to match the impressive number of events hosted by our amazing committee and subcommittee. I want to make sure as many people are aware and participate in our fantastic events that aim to help students in the ECSE department. I'm also really passionate about creating funny and relatable content to help relieve the cohort stress.

Arthur, Marketing Director (Semester 2)

ECSE Common Room

Throughout semester 1 2026, the ECSE Common Room has been open 24/7 for the first time ever, meaning that it could function as a true common room rather than relying on committee members to open it for other students. This accessibility resulted in an enormous increase in traffic, with the room and its amenities being used by the student cohort almost every day this semester alongside the popularity of the ECSE Learning Centre and its common seating area in building 72.

Alongside informal hangouts, study and project work, the ECSE Common Room hosted numerous SMEE events including the Mario Kart Tournament, a PCB design workshop, the ECSE Welcome Event, weekly SMEE Study and the daily SMEE Shop.

The unlocking of the ECSE Common Room was enabled by the support of Monash Student Association Clubs & Societies and the Department of Electrical and Computer Systems Engineering who provided storage space which let us declutter the room, and the Faculty of Engineering who facilitated the SSAF funded renovations of the engineering club hub to provide club and society meeting rooms.

The ECSE final year common room has a history of over 40 years and has been located at room 111 building 35 since 2009. It was renovated in 2017 using SSAF funding allocated for the “SMEE Room Refurbishment”. The Mechatronics Engineering Clayton Club has also used the ECSE Common Room for events and storage since the MAE student common room was deleted in renovations. For decades, the ECSE Common Room traditionally hosted SMEE general meetings, but these have had to move to larger venues from last year due to the growing number of members.

SMEE Shop

Organisers: Amiru Peeli Kumburage

Volunteers: Nhan Nguyen, Timmy Hess, Steph Koutsimpiris, Hugo Knights-Burke, Satria Hadiwijaya, Leonie Chim, Om Patel, Sayuni Perera, Arthur Nguyen, Oliver Hoy

Marketing: Muhtasim Azad

The SMEE Shop was open every weekday for most of this semester, serving ECSE students and hobbyists with a convenient on-campus catalogue of electronics components. Among over 230 purchases, most were for ENG1013 and ECE2131 projects, alongside later units and personal projects. Alongside sales, we also offered a large selection of free passive components, connectors and miscellaneous parts.

First Year Information Expo

Hosted by the Monash Engineering Students Society

Volunteers: Nhan Nguyen, Hugo Knights-Burke, Timmy Hess, Amiru Peeli Kumburage, Sophie Li

Designers: Ozden Huseyin, Muhtasim Azad, Sehaj Attly, Tadiwa Hofisi

SMEE was invited to give a short presentation and a stall at the MESS expo to introduce first year engineering students to the ECSE specialisation and SMEE. Enthusiastic first years had the opportunity to speak with more senior students to get advice on transitioning into university studies and getting involved on campus, as well as the events and services offered by SMEE to first year engineers.

Orientation Festival

Hosted by the Monash Student Association

Organisers: Satria Hadiwijaya, Sophie Li

Volunteers: Nhan Nguyen, Quang Tri Tran, Erin Holland, Ozden Huseyin, Muhtasim Azad, Steph Koutsimpiris, Amiru Peeli Kumburage, Sehaj Attly

Marketing: Kevin Healy

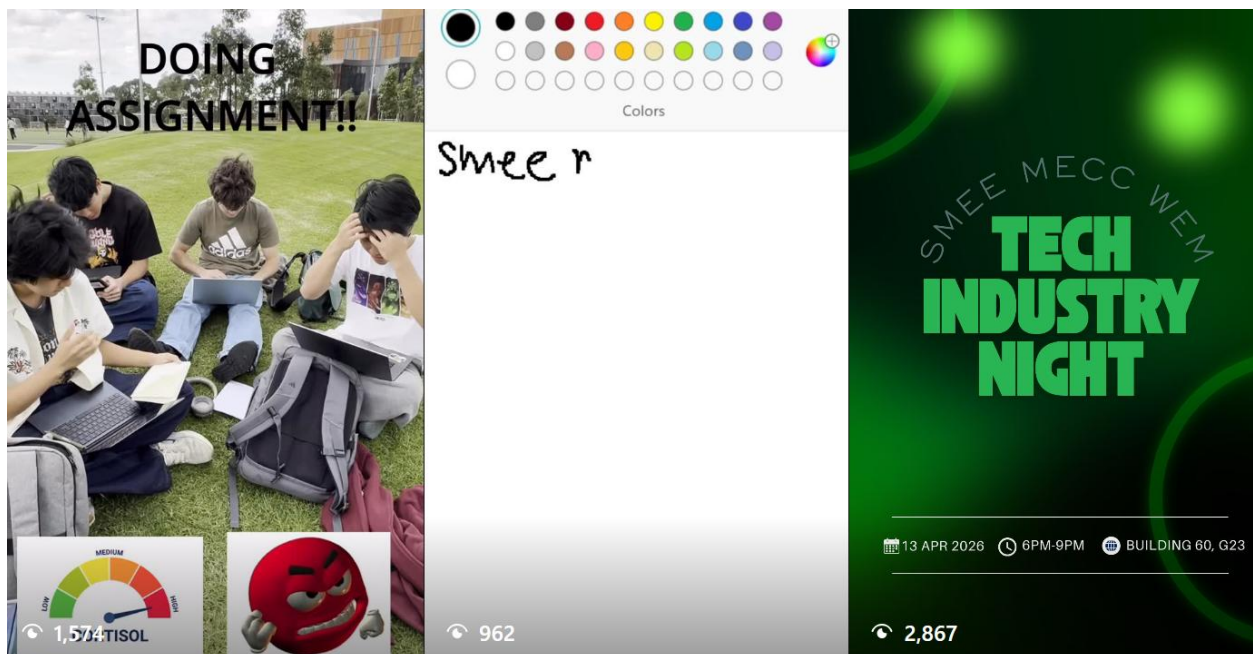

SMEE ran a stall throughout O-Week, giving first year engineers and other students the chance to speak directly with SMEE representatives to find out about university life, SMEE and the ECSE specialisation. The stall engaged students through demonstrations of lab equipment, snacks and merch giveaways, and the “flappy bird” game developed by members of our Technical Subcommittee. Across the week, SMEE spoke with 200 students who signed up for SMEE membership.

Short-Form Videos

Directors: Kevin Healy, Ozden Huseyin, Muhtasim Azad, Arthur Nguyen, Sayuni Perera

The Marketing Subcommittee produces short-form content posted on Instagram Reels both to promote engagement with SMEE benefits and to offer comic relief for the ECSE community. SMEE posted 6 reels this semester for advertising and another 5 for purely entertainment purposes, with the best performing reel receiving 540,000 views.

Inter-University Outreach

This year we initiated a community of electrical engineering societies across Monash University, the University of Melbourne and RMIT University to promote cross-university collaboration, exchange and events. During the mid-semester break, Nhan, Timmy and Arthur visited the University of Melbourne and met committee members from the Melbourne University Electrical Engineering Club, who gave a tour of their engineering facilities and Creator Space. With the deepening of ties with these societies, we have started organising collaborative events beginning with a study session in swotvac and further events such as a pub night.

Discord Server

The Discord community is a forum for the ECSE cohort to socialise and exchange advice. Students frequently use the server to seek help from their peers and alumni with units, the general course and their career. It is also a channel for server members to stay updated with upcoming events and opportunities from SMEE, professional associations and companies.

Minecraft Server

Organisers: Nhan Nguyen, Timmy Hess

The Minecraft server was established in SWOTVAC of semester 2 2025, giving SMEE members an ideal escape from the stresses of exam study. Hosted on a computer in the ECSE Common Room, the server facilitated both fun times throughout the summer and semester 1, and an active community within the cohort.
